Marko Zlatar

Backend Engineer

SUMMARY

I am a Backend Engineer working on web applications and web infrastructure. I have been programming professionally for years but tinkering with computers since a kid. I started in tech with freelance services during high school. Highly skilled in Node.js(TypeScript) and Golang. Have built and delivered B2B & B2C solutions used by hundreds of companies and thousands of customers.

SKILLS

HTML / CSS / JavaScript
Node.js / TypeScript / Golang
NoSQL(MongoDB, DynamoDB) / SQL (MySQL, PostgreSQL)
Microservices / EDA(CQRS, Event Sourcing), Hexagonal
DDD / SOLID / AGILE
Cloud Computing (AWS Primarily)
Version Control (Git / GitHub Primarily)

LANGUAGES

English
Serbian

EDUCATION

Computer Technician
Srednja Tehnička Škola Sombor
High School Diploma

EXPERIENCE

Back End Developer

learnify.to - startup
01/2022 - 03/2022

- bootstrapping the product (design, development, deployment)
- implementing serverless event-driven microservices hosted on AWS, implement Elasticsearch for search
- host frontend react (next.js SSG + SSR) application on AWS Amplify
- learned and implement DDD, CQRS, got into software architecture

Back End Developer

Basiq
05/2021 - 01/2022

- contributed to basiq.io platform, got into the fintech industry
- learned and used Golang programming language and its ecosystem
- learned and used AWS ecosystem, got into DevOps, serverless
- used node.js primarily for web scraping

Back End Developer

Spartans AI
07/2020 - 05/2021

Products I worked on:

- arla.ai - (95% of the time in Spartans)
- Fonamaze - Internal product - (5% of the time in Spartans)

Features and Functionalities I've implemented/contributed to:

- rewrite the application from single-tenant to a multi-tenant microservice system
- design and implement features for file upload, real-time communication, user management, etc.
- implementing solutions utilizing intelligent customer engagement
- implementing NLP chatbot solutions

Freelance Full Stack Web Developer

Freelance
06/2019 - 06/2020

- I found my passion for programming and web development
- Work with clients from all over the world
- Build custom websites with HTML/CSS/JavaScript/PHP/MySQL and other web technologies
- Build web applications/E-Commerce apps with CMS(WordPress)
